TOWNSHIP OF INGERSOLL, MICHIGAN

An Ordinance to establish operational, maintenance, performance, and reclamation standards for mining sites.

THE TOWNSHIP OF INGERSOLL ORDAINS:

Because of the noise, dirt and dust emitted in the mining of sand, gravel and other minerals, and because of the permanent changes in the topographical and geological characteristics of the Township as a result of said mining, and because of the dangers inherent in said mining and said changes by virtue of shifting earth, standing water and other like considerations, and for the purpose of protecting the health, safety and welfare of the residents of Ingersoll Township and further protecting the property of said residents, this Ordinance is enacted.

This Ordinance is enacted by the Ingersoll Township Board pursuant to the authority vested in it by Act 246 of the Public Acts of the State of Michigan for 1945, as amended.

Title.

Sec. 1. This Ordinance shall be known as the "Ingersoll Township Mineral Mining Control Ordinance" and may elsewhere be referred to as "this Ordinance."

(ord. no. 11-A eff. Dec. 1, 1993)

Interpretation, existing operation and restrictions.

Sec. 2. It is not the intention of this Ordinance to repeal, annul, or in any way repeal any existing law or ordinance unless expressly so stated in this Ordinance. Further, it is not the intention of this Ordinance to interfere with operations already existing except that this Ordinance sets forth minimum standards which shall apply to such operations. To the extent that any restrictions or standards imposed by this Ordinance are more stringent and restrictive than existing restrictions or standards, this Ordinance shall control.

4. Other excavations where the Township Board determines, in its sole discretion, that the proposed excavation is unlikely to unreasonably interfere with the enjoyment of life or property and will not expose any person or property to the types of dangers inherent in mineral mining sought to be prevented by this Ordinance. Sec. 4. From and after the effective date of this Ordinance, no person shall operate a new mineral mining site in the Township except in accordance with a license issued under this Ordinance. A license issued pursuant to this Ordinance shall be nontransferable. All existing mineral mining operations as defined by this Ordinance shall obtain a license and comply with the requirements herein no later than one hundred eighty (180) days after the effective date of this Ordinance.

(ord. no. 11-A eff. Dec. 1, 1993)

Licensing procedure.

Sec. 5. Compliance with the following application procedure shall occur prior to the commencement or continuation of any mining which exists or is proposed as of or after the effective date of this Ordinance.

A. All applicants shall use forms provided by the Township Clerk, accompanied by the documents enumerated on that form. Licenses shall have a term of two (2) years. To be considered for renewal, four (4) copies of the proper application with required attachments must be submitted to the Township Clerk at least six (6) months prior to the expiration date of the license. Upon receipt of the four (4) copies of the fully and properly completed application form with the required documents attached, the Township Clerk shall retain an official copy in the Clerk's office and shall forthwith distribute the remaining copies as follows: One copy to the Ordinance Enforcement Officer, one copy to the applicant, and one copy to the Chairman of the Planning Commission.

B. Upon receipt of an application, the Township Ordinance Enforcement Officer shall review the application and attachments, physically inspect the premises to determine compliance with the prior reclamation plans and operational plans, and report to the Planning Commission on such compliance. The Township Ordinance Enforcement Officer shall also estimate of the cost of reclamation upon abandonment for bond amount purposes, and make such additional comments regarding general safety, drainage, equipment removal, and other considerations pertaining to the license application as appropriate. The Township Ordinance Enforcement Officer shall, where he deems necessary, employ and compensate experts or engineers to assist in evaluating the merits of a reclamation or operational plan and the costs thereof. All costs in connection with retention of experts or engineers shall be borne by applicant. C. The Township Planning Commission shall make its final recommendation on the approval or disapproval of the submitted reclamation plan and operational plan within forty-five (45) days of receipt of the Ordinance Enforcement Officer's report in the case of original applications and shall report forthwith its determination concerning the reclamation plan and/or operation plan to the Township Board.

The Township Board shall make a final determination within forty-five (45) days of receipt of the recommendation of the Township Planning Commission in the case of original applications. Failure of the Township Planning Commission or Township Board to act within such time frames shall not result in an automatic license issuance or renewal, but such failure merely results in an extension of any existing license for an additional period up to the time of final determination by the Township Board.

The condition of such bond being that if upon completion of applicant's activities on the parcel described in the application, the land has been reclaimed to the satisfaction of the Township Board, the bond shall be void; otherwise, the Township shall have the right to use the bond proceeds to the extent necessary to reclaim the parcel. This bond shall be kept in effect by the applicant until the parcel or parcels have been restored as required by this Ordinance and until such time that the Township, and its agents and contractors are hereby granted a license to go on the applicant's premises to fulfill the bond requirements. In fixing the amount of surety performance bond, the Township Board shall take into account the size and scope of the proposed operation, current prevailing cost of reclaiming the premises upon default of the operator, and other such conditions and factors as might be relevant in determining the sum reasonable in light of all facts and circumstances surrounding each application. The applicant shall notify the bonding company and provide proof thereof that the Township be notified in the event of any lapse in the effectiveness of the bond. In the event the Township Ordinance Enforcement Officer, Township Planning Commission or Township Board retain expert or engineering services in evaluation of a reclamation or operational plan, all fees and costs related to those professional services shall be borne by applicant. The Township Ordinance Enforcement Officer may demand and the applicant shall deposit an amount of money determined by the Ordinance Enforcement Officer to be an estimate of such costs. (ord. no. 11-A eff. Dec. 1, 1993; min. of Jan. 19, 1998)

Issuance of license.

Sec. 8. Upon finding the applicant has complied with the terms and conditions of this Ordinance and with the terms and conditions of prior licenses and prior submitted plans, if any, a license may be issued by the Township Board.

(ord. no. 11-A eff. Dec. 1, 1993)

Conditions in license.

Sec. 9. Upon the issuance or renewal of a license, the Township Board may impose as conditions of the license any reasonable restrictions or requirements related to the location, design, or operation of a mining site, as required to secure the public health, safety, and general welfare of the community or to ensure that the mining operations will not create a nuisance or unreasonably interfere with the enjoyment of property. Such license conditions may be in addition to the express requirements of this Ordinance.

(ord. no. 11-A eff. Dec. 1, 1993)

Fencing, screening and set-back.

Sec. 10.

A. All excavated and mined areas shall be fenced with a four (4) foot high fence and shall be posted so as to indicate the danger of trespassing in the area. Such posting shall be at each gate and around said premises not more than 150 feet apart. The minimum specifications for said fencing shall be as follows: #9 gauge top wire; #12 gauge bottom wire with spacing of 6 inches by 12 inches. All stays shall be of 14 gauge wire with spacing of support posts to be no greater than 16 feet apart. Gates shall provide the same degree of protection and shall be of similar construction to the fence. Gates shall be closed and locked whenever mining operations are not in process. The required fencing and posting shall be completely installed prior to any excavation at the site, maintained throughout operations and removed or directed to remain upon reclamation as determined by the Township Board in approving the application.

B. All active mining excavations shall be visually screened from view of all adjacent public highways and residentially used parcels to a person standing on the paved portion of the public highway or from the lot line of adjacent residentially used parcels. The following methods are acceptable for screening of mining areas:

1. Construction of a raised earth berm area on the mining site along boundary lines thereof where such lines abut a public highway or abut privately owned property which is improved and occupied for residential purposes. This provision with regard to lands improved and occupied for residential purposes shall be applicable to any land upon which dwellings are built and occupied subsequent to the date of this Ordinance. The berm shall be sufficient in length and height to

screen the mining area. During the planting season next following the placement of the berm and as often as may be necessary to assure the existence of a vegetative ground cover, the applicant shall seed or plant the berm in a manner suitable for the area and soil conditions so as to provide vegetation to check erosion and to provide a visible ground cover substantially similar to the vegetation cover growing in adjacent fields. Where the topography of the area acts as a screen, the Township Board may waive the berm requirement. The berm shall have slopes not in excess of one foot vertical to two feet horizontal.

2. Planting of coniferous trees along the boundaries of the property with sufficient rows and depth to permit effective screening of the mining area.

3. To the extent that the foregoing is not practical, the proposed licensee may submit alternate proposals.

4. The amount and extent of required screening shall be reasonable and practical as determined by the Township Board.

C. No cut or excavation on a mining site shall be made in a manner or location which undermines or weakens the lateral support on any properties or road rights-of-way adjoining the mineral mining site. In no event shall any cut or excavation be made nearer than 50 feet from the site property lines or any public or private road right-of-way.

D. No fixed machinery shall be erected or maintained within fifty (50) feet of any property or street line.

E. No building shall be erected on the premises except as may be permitted in the general zoning ordinance or except as temporary shelter for machinery and field office subject to approval by the Township Board and clearly identified on the plan of operation submitted as a part of the application.

(ord. no. 11-A eff. Dec. 1, 1993)

Hours of operation.

Sec. 11. Maximum hours of operation of the mining operation shall be 7:00 a.m. to 5:00 p.m. No hours of operation shall be permitted on Sundays and legal holidays. In emergency situations this time period may be modified by the Township Supervisor provided such emergency order shall not be effective for more than 72 hours.

(ord. no. 11-A eff. Dec. 1, 1993)

Road access.

Sec. 12. All sites licenses under the provisions of this Ordinance shall have direct access to a County road having a minimum right-of-way width of 66 feet and improved to the specifications of the Midland County Road Commission. When the operation of a licensed area results in the mined material, overburden and/or similar material being deposited or spilled upon the public roadway, it shall be the responsibility of the licensed operator to remove such material immediately.

(ord. no. 11-A eff. Dec. 1, 1993)

Road maintenance.

Sec. 13. Access roads within the license's site shall be maintained by the operator so as to minimize the dust arising from the use of said roads. Such maintenance shall be accomplished through the application of chloride, water and/or similar dust retardant material. Application of oil shall be prohibited. Entrances and exits shall be securely locked during hours of inoperation.

(ord. no. 11-A eff. Dec. 1, 1993)

Operation of equipment and facilities.

Sec. 14. All equipment and facilities used in the mining of sand, gravel, stone or other minerals shall be conducted, maintained, and operated in such manner as to eliminate insofar as practicable, noises, vibrations, or dust which interfere with reasonable use and enjoyment of surrounding property.

(ord. no. 11-A eff. Dec. 1, 1993)

Noise standards.

Sec. 15. Mining sites shall be operated such that the noise of operation or equipment vibration cannot reasonably be considered disturbing to neighboring uses of land. Objectional noises due to intermittence, beat, frequency, or shrillness shall be muffled so as not to become a nuisance to adjacent uses.

(ord. no. 11-A eff. Dec. 1, 1993)

Transportation vehicle standards.

Sec. 16. All vehicles used to transport excavated material shall be required to be loaded in such manner that the material may not unintentionally be discharged from the vehicle. Vehicles shall be cleaned of all material not in the load-bed prior to entering the public streets.

(ord. no. 11-A eff. Dec. 1, 1993)

Lighting.

Sec. 17. All lighting used to illuminate the mining area, access roads, stockpile area, and similar use areas shall be directed away from all surrounding property. Shielding of lighting may be required by the Township Board where such lighting shines directly toward a residential use and/or a county road.

(ord. no. 11-A eff. Dec. 1, 1993)

Drainage.

Sec. 18. Property drainage shall be provided at all times to prevent the collection and stagnation of water, and surface water shall at all times be directed in such a manner so as not to interfere with the adjoining property owners. Pumping of water from the excavated area to the surface that causes the water to flow onto the property of others, either directly or indirectly, through the overflowing of drainage ditches shall not be permitted. Reduced pumping rates may be required to avoid interference with adjoining property owners. There shall be no interference with the water table in the area. Any water areas, retention ponds, settling ponds, or similar water areas shall be fenced in accordance with section 10 of this Ordinance. Erosion control measures shall be instituted to comply with Act No. 347 of the Public Acts of 1972, as amended.

(ord. no. 11-A eff. Dec. 1, 1993)

Termination and reclamation.

Sec. 19. Upon termination of mining operations, the owner of the premises shall be responsible at its cost to reclaim the site in accordance with reclamation plans previously submitted. When the removal of said materials has been once commenced and then such activity has ceased for a period in excess of one year, it shall be presumed that mining operations have been terminated. If the owner fails to reclaim the site, the Township, through the provisions of this Ordinance and by administrative proceedings provided herein, or through the judiciary, may come upon the site and restore the land in accordance with the reclamation plan provided under this Ordinance and approved by the Township Board and may utilize the bond proceeds provided pursuant to this Ordinance to defray the costs thereof. If the bond proceeds are insufficient to defray costs, any funds expended by the Township will be billed to the owner of the property and if unpaid within 60 days shall become a lien thereon and shall be included in the next tax bill.

(ord. no. 11-A eff. Dec. 1, 1993)

Bank slopes.

Sec. 20. The banks of all excavations shall be sloped to the water line in a water-producing excavation, and to the pit floor in a dry operation at a slope not to exceed 45 degrees with the horizontal.

(ord. no. 11-A eff. Dec. 1, 1993)
