

NOTICE

Midland County Mosquito Control

Will be applying aerial larviciding material for mosquitoes during
April 1-30, 2025 in the areas outlined below*:

Vectobac® 12AS *Bti* or Vectobac® G *Bti* (*Bacillus thuringiensis israelensis*) will be applied to woodland pools in these areas by airplane as weather permits. The material used in this program is a naturally-occurring soil bacterium which targets mosquitoes and related biting flies.

*Spring conditions in 2025 are abnormally dry. Should this situation continue, the extent of the program will be reduced in an effort to appropriately respond to field conditions. Please contact MCMC to inquire about specific areas.

For more information, call Midland County Mosquito Control at (989) 832-8677 or visit <https://midlandcountymi.gov/mosquito-control>
